School of Design, Southern University of Science and Technology
Shenzhen, China

Type of entry
Dynamic Estate Scale Model, Map Generation Device

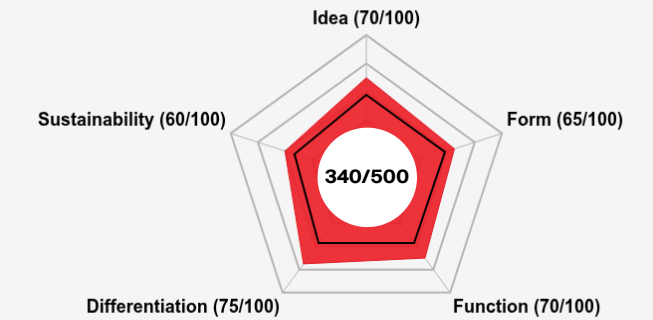

Entry-ID
740659

Scorecard & Result

In the iF Final Jury, each entry is assessed by a panel of three jurors using the five criteria listed on the right. The questions for each criterion help jury members score the entry. The average score for each criterion is calculated, and the sum of the averages determine the final score for the entry.

— Average score
■ Your score

Your entry's final score is 340 points.
The winner score is 275 points.

Idea What was the task? Why is it relevant?
Why is the idea appropriate?

Form Why does it look the way it does?
How does it engage the target group? How is it made?

Function Why can it be used with ease?
Why does it work well? How does it serve the user?

Differentiation Why is it new? How does it support the brand?

Sustainability Why is the project sustainable?
Social benefit: How does it serve society?
